Education

Nandha Engineering College	B.E (CSE)	CGPA:8.144 (Till V Sem)	2023 – Present Erode
Reliance Matric Higher Secondary School	HSC (12th)	Percentage: 80%	2021 – 2022 Namakkal
	SSLC (10th)	Percentage 74%	2019 – 2020 Namakkal

Skills Summary

Programming Languages:

Java, Python(Basics)

Spoken Languages:

Tamil-5/5, English-4/5,
Hindi-2/5, Japanese-1/5

UI/UX Tools:

Figma, Canva

Front End:

HTML, CSS, JavaScript, React

Visualization & BI Tools:

Tableau, Microsoft Excel

Developer Tools:

Antigravity, Eclipse, GitHub, VS Code, Jupyter Notebook, Google Colab, PowerPoint, Word

Soft Skills:

Strong communication, teamwork, problem-solving, adaptability, and time management skills.

AI Tools:

Current Update with new AI Tools like ChatGPT, Claude, Grok, GitHub Copilot, Lovable, Firebase, Supabase, n8n, Base44, and other AI tools.

Projects

AI INTERVIEW SIMULATOR

Developed an AI-powered interview simulator with resume-based questions, voice analysis, feedback, scoring, and interview history.

Tech Stack: React.js (Vite), TypeScript, Tailwind CSS, Flask, Python, Ollama (Llama 3.2), Whisper, PostgreSQL.

INTELLIGENT-FLASHCARDS

Developed an AI-powered Smart Flashcard Generator that creates flashcards from notes with AI summaries, keywords, entities, voice support, and study history.

Tech Stack: React.js (Vite), TypeScript, Tailwind CSS, Flask, Python, spaCy, MongoDB Atlas, JWT

AI-OUTREACH-HUB (Vibe Coding for Infynd Company task purpose)

Developed an AI-powered multi-agent outreach system for lead classification and personalized email campaigns.

Tech Stack: HTML, CSS, JavaScript, Python, FastAPI, PostgreSQL, LLM.

AI-VENDOR-SELECTION

Developed an AI-powered vendor quotation system for data extraction, vendor comparison, and best vendor recommendation.

Tech Stack: React.js (Vite), TypeScript, Tailwind CSS, FastAPI, Python, PostgreSQL, Tesseract OCR, OpenCV.

Green Chilli Leaf Disease Detection using Transfer Learning (Vibe Coding)

Developed an AI-powered chilli leaf disease detection system using transfer learning for accurate disease classification.

Tech Stack: Python, TensorFlow, Keras, OpenCV, NumPy, Pandas, Scikit-learn, CNN, MobileNetV3, EfficientNet-B0, DenseNet121.

SSN HOSPITAL APPOINTMENT BOOKING

Developed an AI-powered Hospital Management System for patient registration, appointment booking, doctor management, and secure authentication.

Live Demo: ssn-hospital.in

Tech Stack: React.js (Vite), TypeScript, Tailwind CSS, FastAPI, Python, MongoDB Atlas.

Certifications

- HTML5, CSS3 (Infosys Springboard)
- NPTEL – Cloud Computing, Cyber Security & privacy, Forest & their Management with 97%
- College Tech Workshops

Achievements & Activities

- Participated in AIM'25 Hackathon at Infynd Company, Coimbatore and shortlisted for the assessment process.
- Received a special prize in TANCAM Hackathon.
- Participated in mini hackathons, paper presentations, and project presentations at college symposiums.

Internships

- Frontend Developer Intern – WeeWay InfoTech (15 Days)
- AI Software developer Intern - Shellkode (15 Days)
- Rinex – (28 Days)
